Fabric

Memo's introduces Sunbrella® fabric, an American brand fabric, whose production process passed the ISO9000 certificate. It's 100% solution-dyed acrylic fabric and has more color designs.

Life is art in here.
Life and art are inseparable.
Life appears to be noble when there is art.

PET Fiber

Polyester Staple Fiber (PET) is well-known recycled materials that are decomposed from the process of refined petroleum and mixed with physical composition. It could use as a filling for cushions.

In addition, PET has been recognized by several international quality certificates, including International Environmental Protection Standard and British Standard BS-5852 which tested by Hong Kong Standards and Testing Center.

A general cushion includes: Fabric, Zipper, Label, Non-woven cover and filling. Also it will have different size and style according to your requirement.

Filling

Quick Dry Foam: This material is of strong air-conductivity, excellent water permeability, good elasticity, great compressive strength and long lasting resistance to deformation.

Polyester Fiber (PET): This material is of strong air-conductivity, excellent water permeability, good elasticity, great compressive strength and long lasting resistance to deformation, which not only meets British Standards Fire Retardant BS5852 but also can be recycled for environmental protection.

Foam: This material is not only soft and comfortable, but also good elasticity and great compressive strength, which meets fire retardant standards.

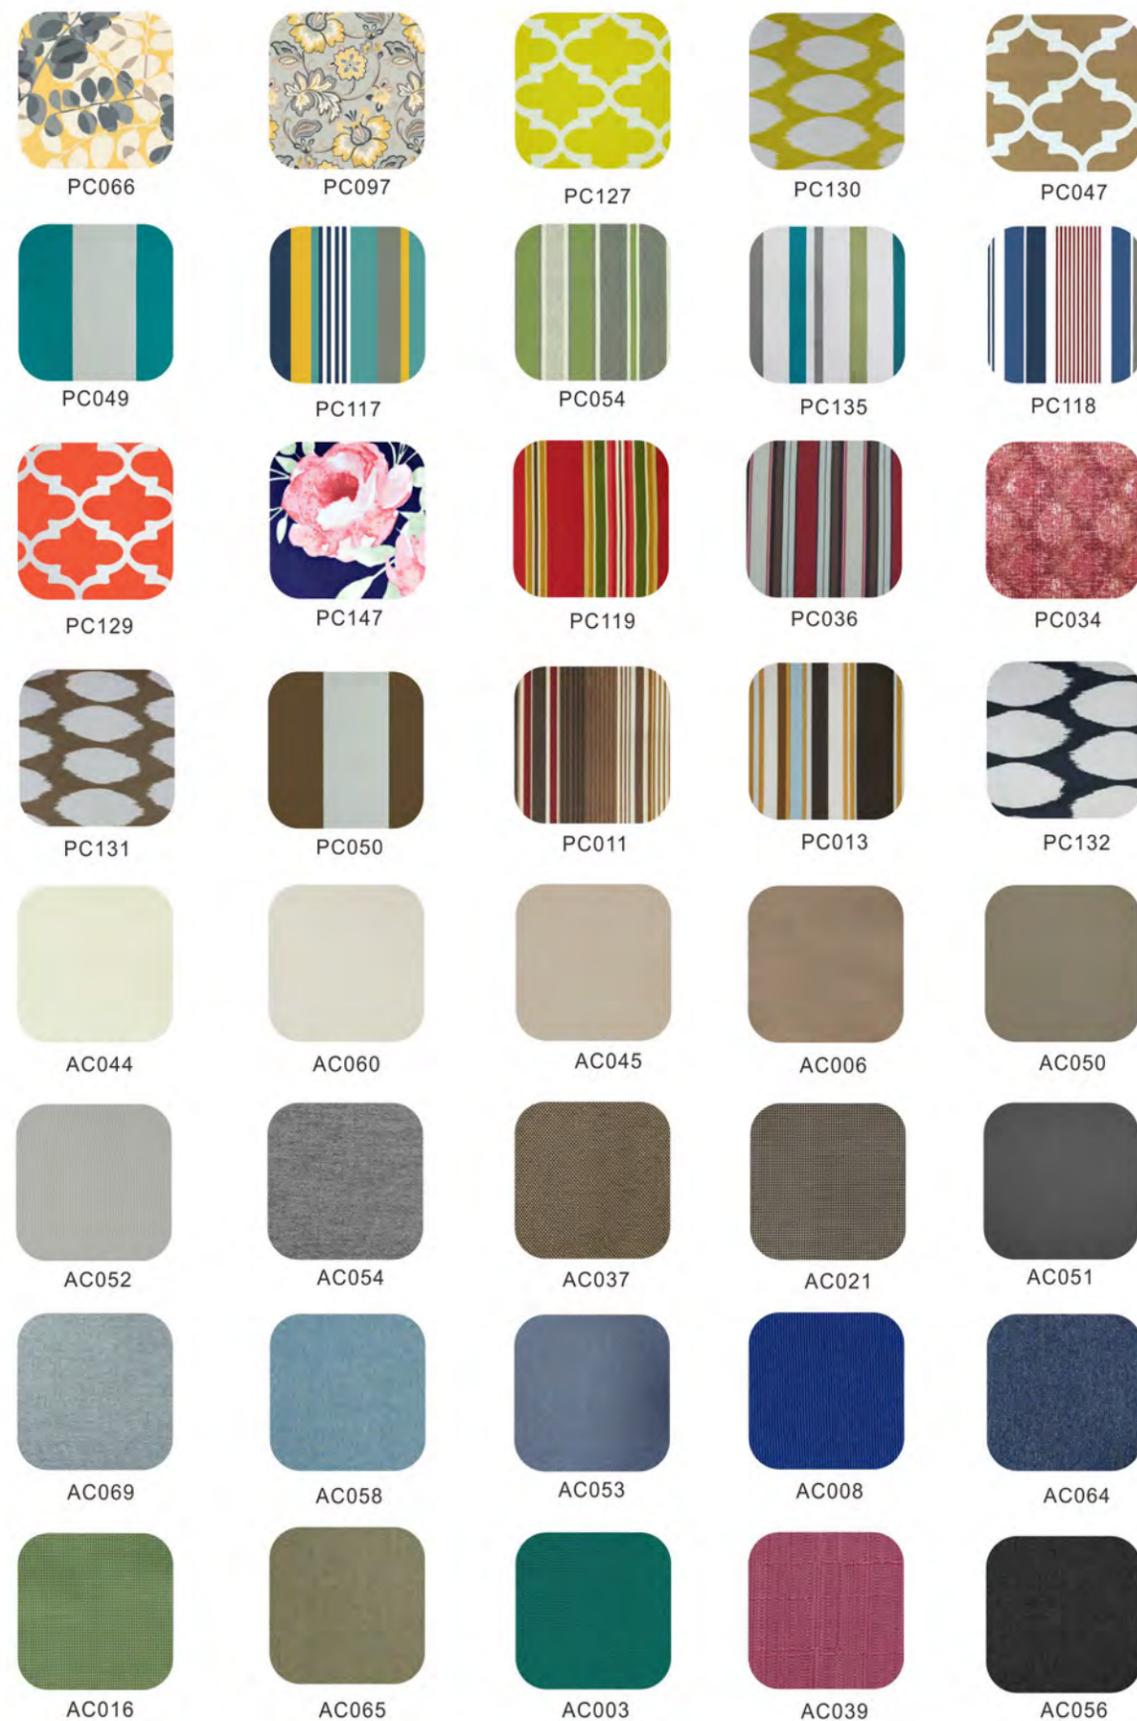

Quick Dry Foam

Polyester Fiber(PET)

Foam

Polyester

Material: 100% Polyester
Weight: 320gram/m²
Yarn count: 600Dx10S/2
